

BIPW3150 Chlorinator

BI Pure's tablet-fed chlorinators use the Accu-Tab proven and certified system of calcium hypochlorite tablets instead of liquid bleach or gas. The tablets are eroded by a stream of water to generate the chlorinated liquid solution. The solution is stored in a tank until injected into the drinking water by a metering pump. Precise chlorine delivery is controlled by the rate of water flow.

BIPW 3150 Chlorinator in Banff

SPECIFICATIONS:

Chlorine Delivery 5.7 kg/hr (12.5 lb/hr)
Water Flows 1000–8000 L/min
Chlorine tablets 68% chlorine
Chlorinator Size 61 cm (24") W x 157 cm (62") L
x 132 cm (52") H

Engineered for:

Potable drinking water flows up to 8000 L/min

Benefits:

Easy to use

- No spill or leak concerns
- While sodium hypochlorite is 90% water, the Accu-Tabs are dry, have lower shipping costs, and can be purchased in bulk.
- Less personal protective equipment is required when handling tablets.

Low maintenance

- Reliable performance: no moving parts in the tablet feeder and no small openings that can clog.
- Erosion technology helps prevent scale formations
- The PVC feeder is very durable and comes with a lifetime warranty. Low capital costs.
- Tablets have a long shelf life (about a year) compared to bleach/sodium hypochlorite which can lose half its chlorine in two months of warm weather.
- Chemical is concentrated allowing for smaller, stackable pails.

Easy to install in existing systems

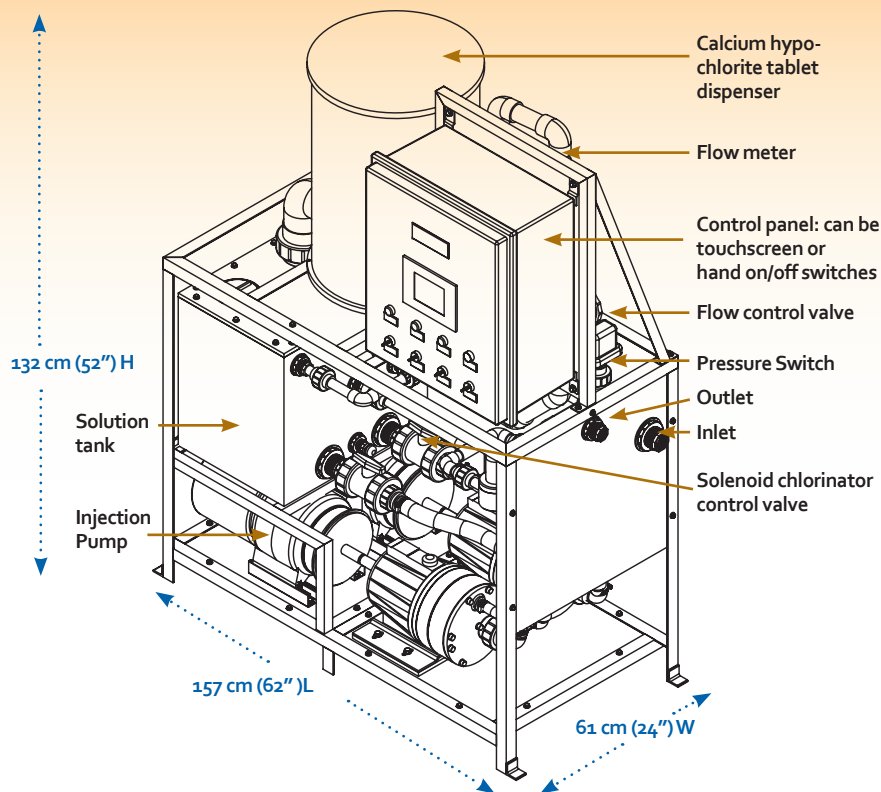

- Two plumbing connections (inlet and outlet PVC plumbing)
- One electrical connection with plug
- One chemical controller connection with plug

NSF/ANSI
Standard 61 listed
